

SALES BULLETIN

TOPIC: WIRELESS REMOTES

TO: ALL SWAPLOADER DISTRIBUTORS

SwapLoader is pleased to announce the addition of Wireless Remotes to our product line-up. This state of the art microprocessor based radio frequency control system will provide the operator the ability to wirelessly operate the SwapLoader Hook Lift.

Includes transmitter, receiver, magnetic charging pad and charging cable.

Wireless remotes are currently available for our 2-Section EHV and U-Lock EHV packages on 100 and 200 Series hoist models.

Key Features:

-  Battery and Transmit Status Indicator LEDs
-  U-Lock Indicator LED (where applicable)
-  Unique radio ID allowing multiple systems to work in proximity
-  Cloning if more than one transmitter is desired
-  Compatible with existing EHV systems
-  Phone app provides diagnostics and backup hoist control
-  For operator safety, the remote only functions when a 12V signal from an engaged parking brake is received or the remote is connected to the charger
